SUMMARY

20 years building and shipping web products for organizations around the world — most recently as a Senior Front-End Developer on enterprise platforms across government, nonprofit, and membership sectors. What I bring to a team isn't just code: it's years of translating what stakeholders actually need into something a team can build and ship. Hands-on focus: web accessibility (WCAG 2.2 AA, ADA, Section 508).

SKILLS

HTML + CSS: HTML5, CSS3, SASS, Tailwind CSS, responsive design

JavaScript: ES6+, jQuery, Vanilla JS

Web Accessibility: WCAG 2.2 AA, ADA, Section 508, axe, Playwright, WAVE, PowerMapper, Lighthouse, NVDA, VoiceOver

CMS: Drupal, WordPress, Twig

UX / UI Design: Figma, Adobe XD, wireframes, style guides, component-based design

Tooling: Git, SVN, Gulp, PHP, Lando, Webpack

EXPERIENCE

Front-End Developer & UX/UI Designer · Freelance 2006–present
Remote

- End-to-end projects for direct clients in Brazil and abroad: UX/UI design, front-end and CMS builds, from concept to deploy.
- Logo design for small businesses, carried into their websites and newsletters.
- Selected client work: behance.net/paulogabriel

Senior Front-End Developer · Taoti Creative 2018–2026
taoti.com · Remote

- Front-end developer on multiple enterprise Drupal and WordPress builds for government, nonprofit and membership organizations.
- Focused on web accessibility auditing and remediation, helping clients meet WCAG 2.2 AA, ADA and Section 508 so their sites work for everyone, including people who rely on assistive technologies.
- Used Playwright with axe-core to automate accessibility checks, combining them with manual testing to catch issues automated tools miss.
- Built responsive, component-based interfaces with HTML5, CSS3 and JavaScript, Twig templates, Tailwind CSS, Lando environments and Git — maintaining long-term client sites through modular, maintainable code.
- Used agentic AI coding tools (Cursor, Copilot, Claude Code) in daily front-end work: migrated legacy ACF field groups to native Gutenberg blocks, turned Figma specs into code through Figma's MCP integration, debugged complex issues and extended search filtering. Kept AI-generated code consistent with the codebase by grounding it in existing component patterns.
- Authored build specifications that scoped the technical approach for new projects and guided estimation.
- Performed QA across the team's work: verified completed tasks, validated client sites after security updates and checked builds against requirements before release.

Visual Design Engineer · Crossover

2017

crossover.com · Remote

- Contributed to a client project for Acquia, the company behind Drupal, as part of Crossover's global talent network.
- Owned the SCSS / styling architecture for the Kitewheel MVP, taking it through to launch.

UX/UI Designer & Front-End Developer · Printi

2012–2016

printi.com.br · Remote

- Early team member, working directly with product management to design and ship new pages and services.
- Designed UX/UI for new features and built them as front-end pages for the back-end team to integrate.
- Contributed during a period of rapid growth in which Printi was named Best B2B Company by Brazil Founders (2014 and 2015).

Writer · Abduzeedo

2008–2019

abduzeedo.com · Remote

- Wrote for one of the world's most recognized design blogs, online since 2007: inspiration pieces, ideas and interviews for the global design community.

UX/UI Designer & Front-End Developer · Zee Design

2006–2012

zee.com.br · Porto Alegre, Brazil

- Delivered full design solutions for a range of clients, from UX/UI and responsive design through front-end development.
- Translated design concepts into responsive implementations; produced wireframes, prototypes and style guides.

EDUCATION

B.A. in Social Communications — Publicity & Advertising · Federal University of Rio Grande do Sul, Porto Alegre, Brazil · 2012
